Career Objective

As someone who has just started the journey of becoming a Frontend Web Developer, I am eager to learn more about the world of computer science and appreciate all the opportunities that come my way. I am a self-motivated, positive person and believe that this attitude helps me and the people I work with to communicate freely. It also encourages me to keep looking for solutions in any difficult case and never give up until my team and I have found a solution. While I am striving to improve my strengths, I understand that I still have weaknesses on which I am working hard to improve day by day.

Technical Skills

CSS

HTML

TypeScript

JavaScript
